

# Board of Directors' Report and Financial Statements

1Jan. - 31 Dec. 2023

### Board of Directors' Report 1 Jan. - 31 Dec. 2023

#### General

Valio is owned by some 3 400 dairy farms through co-operatives. The company's primary purpose is to process the raw milk produced by the dairy farmer entrepreneurs and support their livelihood by paying the best possible price for raw milk. Valio pays its income from operations through dairy co-operatives to dairy farms.

Valio's vision is to be the leading dairy and food company offering much loved brands and innovative solutions. Our strength lies in dairy business operations in Finland, Sweden, and the Baltic States, and we will continue to further their development. At the same time, we are seeking growth in new food categories. We also supply Food Service customers through our Valio Aimo® wholesale business. The third important strategic focus where we seek strong growth is ingredients and solutions that generate added value for our international industrial customers. In addition, we are building the food system of the future through new business opportunities and innovations. The most recent examples are Oddlygood with its plant-based products, and Suomen Lantakaasu Oy which produces renewable energy.

The operating environment in 2023 was once again challenging for food industry companies. The war in Ukraine and general economic uncertainty continued to prevail, and global supply chain issues impacted, for example, ingredient availability. Consumers' declining purchasing power increased price sensitivity, and they switched to more affordable products. The period following the coronavirus pandemic and the outbreak of war in Ukraine has increased volatility in the dairy market. The prices of the key dairy products on the global market, milk powders and butter, went into a steep decline in autumn 2022, having peaked at record-high levels before that. After an exceptional period, the prices of industrial dairy products returned to their five-year average level.

Farms also faced difficult conditions. Although the persistent rise in costs at dairy farms came to an end, and the prices of energy, animal feed, and fertilisers even fell, costs were still around 30 per cent higher at the end of 2023 compared with the beginning of 2021. In addition, the farms' liquidity was hampered by changes to the payment schedules of agriculture subsidies. These were challenging for farms located in subsidy areas A and B in particular, as the dairy cow premium for 2023 was rescheduled for payment in 2024. So the difficult financial times are not over for the farmers. High interest rates, high fertiliser prices, and uncertainty regarding energy prices continue to prevail.

Valio Ltd took in 1 664 million litres of raw milk in Finland, 18 million litres less than in the previous year. The average price paid for raw milk was 53.7 cents per litre (2022: 52.1 c/l). A total of EUR 902 million (2022: EUR 883 million) was paid to the owners, comprising the raw milk price, dividends, and interest. Valio Group net profit totalled EUR 21 million (EUR 26 million).

Valio Group net sales stood at EUR 2 278 million (EUR 2 236 million), up 1.9% on 2022. Domestic net sales increased by 6.8 per cent, and international net sales decreased by 6.5 per cent. The milk margin amounted to EUR 983 million (EUR 1 008 million), and the milk return stood at 51.6 cents per litre (52.5 c/l).

In 2023, Valio Group net sales increased by 1.9 per cent. The growth stemmed largely from the price rises implemented in 2022. Weakening consumer purchasing power, and the drastic decline in the global market prices of butter and milk powder together with cost inflation, resulted in a fall in the milk return, which is used to measure profitability.

Due to the aforementioned financial factors, Valio had to reduce the price paid for raw milk. Although the average price paid for raw milk by Valio to dairy co-operatives in 2023 was higher (53.7 c/l) than the 2022 average (52.1 c/l), the price level was considerably lower at the end of the year compared to the beginning.

Despite the challenging operating environment, we advanced our strategy in determined fashion. In our domestic market, comprising Finland, Sweden, and Estonia, we succeeded in defending our market position in the face of weakening consumer purchasing power. We also continued to develop the Food Service concept.

In Finland, we increased our market share in items such as snack products, cottage cheeses, and cheeses. We successfully extended, for example, the Valio PROfeel® snack product family, and the range of Valio baking products and grated cheeses. In autumn, we launched the renewed Gold&Green® brand as well as new, plant-based Gold&Green® products. Gold&Green® took over as market leader in Finland during the autumn, and towards the end of the year the total market for plant-based products began to grow again.

Net sales from Valio's international operations totalled EUR 778 million (EUR 832 million).

In export markets, Valio's profitability was challenged by the fall in global market prices of industrial products, and the poor global economic conditions. This was apparent in the decreased demand for value-added ingredients and solutions. Customers favoured more affordable basic products and postponed their product development projects. Investments in value added ingredients continued. The sales of both lactose free Valio Eila® and organic milk powders increased.

The fall in prices of international industrial dairy products, that is industrial butter and milk powders, ended during 2023. The demand for industrial butter was strong towards the end of the year as the price levels rose, yet remained clearly below the level of 2022.

In China, we continued to invest in sales of value added milk powders, and in growing the market. However, the general deceleration of the rising rate of inflation, and falling food prices after their rapid increase in 2022, had a negative effect on the price of basic and organic milk powders, and the value of sales decreased on the previous year. Nevertheless, our profitability improved. Our profitability increased considerably in the United States. In Sweden, net sales increased on the previous year, mainly due to price rises. Sales of Oddlygood®, PROFeel®, and Gårdsgoda products developed positively. In the Baltic States, we successfully defended our position as market leader, despite high inflation and consumers' weaker purchasing power.

Owned by Valio and Mandatum Asset Management, Oddlygood expanded into new markets, and established subsidiaries in Great Britain and the Netherlands. In

October, the company acquired the Nordic brand Planti. The acquisition accelerated Oddlygood's strong growth and further strengthened its plant-based supply, especially in snack and cooking products.

The business development of Suomen Lantakaasu Oy progressed as planned. We completed the environmental impact assessment for the biogas plant in the Upper Savo region, and submitted an environmental permit application. In accordance with a hybrid model for biogas production, the project in Upper Savo will develop the main plant in Kiuruvesi, as well as three satellite plants in neighbouring municipalities. Suomen Lantakaasu Oy also started to map new plant locations in the Ostrobothnia region, and signed a share purchase agreement on a majority shareholding of Nurmon Bioenergia Oy's unfinished biogas plant project. Together, these projects will enable production of up to a half of Suomen Lantakaasu Oy's target of 1 TWh.

Valio is running a programme on the improvement of financial performance that started in 2022 and will continue to 2025, whose goal is to significantly improve the milk return. We aim to advance profitability by tens of millions of euros through hundreds of different measures, looking to reduce costs, seek cost-effective ways of working, improve daily operating processes, and reduce, for example, any wastage of time. The programme is proceeding on schedule and in accordance with the goals.

Valio renewed the dairy farm sustainability programme in May. In addition to measures related to animal well-being, dairy farms may now receive a higher price for their milk based on grazing and opportunities for cows to stay outdoors, farming that supports biodiversity, and work to reduce the carbon footprint of the farm. The reform is significant for agriculture overall in Finland, as around 80 per cent of the milk produced in the country is covered by Valio's sustainability programme.

Valio again topped the Sustainable Brand Index comparison that measures Finns' perception of brands' sustainability. Respondents especially valued Valio's domestic food production, healthy high-quality products, and our work on animal well-being and the climate. In addition, Valio was the third most reputable company in T-Media's Reputation & Trust survey, in which consumers name Finnish companies with the best reputation.

#### Changes in group structure

Oddlygood Global Oy established its first subsidiaries in the United States, Estonia, and Sweden in late 2022, and in 2023 added the Netherlands and Great Britain.

#### Shareholders and share capital

Valio Ltd has 13 shareholders, the same number as in the previous year. The share capital of Valio Ltd stands at EUR 166 127 400, and Valio Ltd shares number 48 861. They are all of the same type and confer identical rights to dividends and the company's assets, with the exception that dividends can be partially distributed to Valio's procurement co-operatives in proportion to their supplied milk volumes. The shares carry a redemption clause.

#### Risk management

As an international food industry player, Valio's business operations are affected by the global operating environment and milk market, as well as domestic demand and competition. As a significant raw milk processor and food product manufacturer and distributor, the continuity of business operations, processes, and information systems are of key importance, enabling us to ensure a high level of supply performance to customers every day. At the same time, Valio contributes to securing Finland's national emergency supply in various exceptional conditions.

Product safety, occupational safety, and quality lie at the heart of Valio's risk management, and, if they fail, the risk is personal damage, and possible liability risks for both consumers and Valio's customer companies. The goal for occupational safety is zero accidents. Reputational risk that damages the Valio brand is also associated with the risk factors.

The operating environment remained challenging in 2023. Instability was caused by the weakened global economic conditions, increasing cybersecurity threats, the rise in inflation, interest rates and costs, as well as changes in consumer behaviour. The focal point of risk management was to ensure Valio's preparedness for the changing regulations at the EU and national level that will enter into force in 2024. With respect to sanctions against Russia, the obligation to identify customers and suppliers is emphasised. Growing political tensions in Asia, and increasing extreme weather phenomena, emphasise the supply chain risks. Despite all the uncertainty factors in the operating environment, Valio has been able to maintain its supply performance at an excellent level.

The goal of Valio's risk management is to identify, evaluate, and manage the risks that threaten the company's goals for its business operations. That is the responsibility of the business operation units supported by the Risk Management Office. In Valio's risk management policy, the risks are classified as strategic, operative, financial, and compliance.

The Risk Management Office administers insurance programmes covering Valio Ltd and the whole Group. It also guides insuring in subsidiaries. Valio insures against risks that would significantly impact the Group's operating capacity. The scope of insurance cover and sufficient insured amounts are continuously evaluated, for example, in conjunction with the risk mapping of Valio locales, taking the Valio Group level perspective into account.

#### **Legal proceedings**

The Finnish Competition and Consumer Authority proposed that a fine of 900 000 euros be imposed on Valio for breaching a condition related to the acquisition of Heinon Tukku. The case is pending in the Market Court, which is expected to issue its resolution by the end of 2024.

### Research and development

Valio launched a total of 88 new products in 2023 (2022: 66) in Finland, as well as new products in other markets. Six new patent applications were filed in 2023 (2022: 0).

R&D and quality control costs totalled EUR 33 million (EUR 30 million), or 1.5% (1.3%) of net sales.

#### **Personnel**

The average number of employees in Valio Group in 2023 was 4 360 (2022: 4 457), and at the end of the financial year the number stood at 4 247 (4 256). On average, 3 542 (3 472) employees worked in Finland and 586 (717) in foreign subsidiaries. Valionova Tukku- ja Logistiikkapalvelut Oy, the Finland subsidiary of significant size, had on average 213 (246) employees. Of the foreign subsidiaries, the highest number of staff was found in Estonia, on average 456 (452).

Personnel distribution by gender in 2023 was 53% male and 47% female (55% and 45%). The average age of employees in 2023 was 43 years (42 years).

The salaries and other remunerations paid by Valio Group in 2023 amounted to EUR 222 million (EUR 214 million). Pension costs for the year stood at EUR 31 million (EUR 25 million).

#### **Environmental protection**

Valio's environmental system is certified in accordance with the ISO 14001 standard, and covers the company's operations in Finland and Estonia. No significant deviations from environmental legislation or the requirements of the authorities have been detected in the internal audits that are part of Valio's environmental system, or in inspections conducted by an external auditor. Neither were any significant deviations from permit regulations detected in permit inspections conducted by the environmental authorities.

Significant environmental impacts of Valio operations are caused by the waste water load resulting from production wastage, water and energy consumption as a downside of maintaining a high level of hygiene, and waste management of spent packages.

Capital expenditure during the financial year targeting the reduction of environmental impacts amounted to EUR 1.0 million in Finland, and environmental costs recorded as expense totalled EUR 14.3 million. The most significant single investment related to the management of environmental impacts was participation in the renovation of a waste water purification plant in one Valio locale. A document delineating Europe-wide environmental protection regulations for the food industry was published at the end of 2019. The transition period for the required changes expired in December 2023. In some powder drying units, studies on conforming to the new permitted limits remained ongoing in 2023.

Valio Group's total energy consumption in 2023 stood at 788 GWh, waste water volume was 6.0 million cubic metres, and the waste water load directed at water purification plants was 9 440 tonnes calculated in terms of chemical oxygen demand (COD). Compared with the previous year, energy consumption decreased by 0.5 per cent, waste water volume increased by 0.1 per cent, and the waste water load decreased by 2.1 per cent. The figures include information on Planti's business operations from the date of acquisition.

Valio published its own climate programme in 2018, looking to cut the carbon footprint of its milk value chain to zero by 2035. The Science Based Targets set by Valio with regard to climate were approved in spring 2021. According to the targets, the greenhouse gas emissions of milk production per litre of raw milk taken in will be halved by 2030 compared with 2019. Furthermore, the goal is to halve the energy

use emissions from the plants in total, and cut emissions from milk collection logistics by one-third in the same timeframe. Valio participated for the fifth time in CDP evaluation (evaluation of the environmental programmes and measures taken by companies by an independent party). The result (A-F) improved in several categories, but the overall score remained in the second-best class (B).

Valio continued training dairy farmers in carbon farming in 2023, more extensively as the coronavirus pandemic eased, and the training has now been provided at around 1 500 farms. Carbon farming is practised on nearly 130 000 hectares of farmed land at Valio dairy farms. Training in the application of the Valio Carbo® Farm Calculator continued throughout the year. Close to 2 500 farms calculated the carbon footprint of their own production, which accounts for around 80% of Valio's total milk procurement. The model used as the basis for the Valio Carbo® Farm Calculator was developed further together with the Natural Resources Institute Finland and Atria Plc. Based on discussions held during 2023, it is now certain that the Valio Carbo® Farm Calculator will become the national standard in carbon footprint calculation for cattle farming in Finland.

Suomen Lantakaasu Oy, a joint venture between Valio and energy company St1 Oy, continued operations in 2023 according to its business plan. The construction of the first plant facility in Upper Savo proceeded as planned. The locations of all plants within the project were confirmed, the environmental impact process of the central plant completed, and its environmental permit application submitted in autumn 2023. In a hybrid model for biogas production, the central plant (biogas production and gas liquefaction unit) will be built in Kiuruvesi, together with three medium-sized satellite plants in Lapinlahti, Sonkajärvi, and Nurmes from which the gas will be transported to the central plant for liquefaction. It is intended that the final investment decision on the hybrid facility will be made in autumn 2024, and that the plant will be in operation by 2026. Also, planning for the next hybrid facilities in Northern, Central, and Southern Ostrobothnia commenced in 2023.

In 2022 and 2023, Valio successfully piloted the use of a feed additive to reduce the methane emissions of cows at Valio dairy farms. The pilot process implemented in 2023 involved 40 dairy farms and more than 3 000 cows. The feed additive worked well in practice, encountering no problems in production, milk quality or animal health. The goal for 2024–2025 is to expand the use of the additive. At the same time, we are looking to provide an opportunity for export customers to participate in reducing methane emissions together with Valio.

More detailed environmental information on operations in Finland is published as part of the Sustainability Report on Valio Ltd's website.

#### **Net sales**

Consolidated net sales amounted to EUR 2 278 million (EUR 2 236 million) and domestic net sales stood at EUR 1 499 million (EUR 1 404 million). Net sales from international operations totalled EUR 778 million (EUR 832 million). Valio Ltd net sales totalled EUR 2 002 million (EUR 1 944 million).

#### **Capital expenditure**

Consolidated investments totalled EUR 79 million (EUR 55 million), or 3.5% (2.5%) of net sales.

The most significant completed investments were the renovation of maturation cellars for Valio AURA® cheese in Äänekoski, new powder packing equipment in Lapinlahti, and improved energy efficiency and changes made to heat production in Finland. In addition, in Finland and Estonia, production equipment and IT systems were replaced, and product ranges and packages redesigned.

The most significant new investments were for the replacement of the powder plant cleaning centre and regional laboratory in Seinäjoki, of production premises and equipment in Suonenjoki, and of the enterprise resource planning system.

Part-owned by Valio, Oddlygood Global Oy acquired the Planti® brand rights. Also, Valio acquired Planti's production of the plant-based Planti® products, located in Turku. In addition, Valio became a shareholder in eniferBio Oy.

#### **Finance**

Both Group and parent company liquidity remained good throughout the financial year. Cash in hand and at banks, and short-term investments, totalled EUR 230 million (EUR 235 million) at the year-end. The value of inventories stood at EUR 235 million at the end of the financial year and EUR 254 million at the beginning. Interest-bearing liabilities totalled EUR 295 million at the end of the financial year and EUR 325 million at the beginning. Loans from financial institutions decreased by EUR 30 million. Of loans from financial institutions, short-term loans stood at EUR 39 million (EUR 30 million) and long-term loans at EUR 171 million (EUR 210 million). The parent company has at its disposal binding lines of credit totalling EUR 110 million (EUR 110 million). Net financing expenses amounted to EUR 7 million (EUR 7 million), or 0.3% (0.3%) of consolidated net sales.

Valio Ltd has a capital loan, in accordance with Section 12 of the Limited Liability Companies Act, totalling 77 626 800 euros. Of that amount, 30 000 000 euros is capital loan recorded under shareholders' equity, in accordance with Chapter 5, Section 5c of the Finnish Accounting Act. The share of capital loans recorded in shareholders' equity has no due date. Interest is paid once a year. The other part of capital loans, 47 626 800 euros, has a due date and shall be paid as a lump sum on that date. Interest is paid once a year. The principal and interest on the loans shall be repaid at a lower priority than debts to other creditors, were the company to be placed in liquidation or declared bankrupt. The principal may otherwise only be returned and interest paid to the extent that the total of the company's nonrestricted shareholders' equity and all capital loans exceeds the amount of loss confirmed for the company's most recent financial year or included in more recent financial statements at the time of payment. No security shall be given for the payment of the principal or interest. If interest cannot be paid, it shall be transferred for payment on the basis of the first such financial statements that allow its payment. No unpaid interest not entered as cost has accrued for the loans.

#### **Financial performance**

Consolidated profit before taxes was EUR 17 million (EUR 38 million). Net taxes for the financial year totalled EUR -7 million (EUR -14 million). Net profit for the financial year stood at EUR 21 million (EUR 26 million).

Parent company profit before taxes and appropriations stood at EUR 9 million (EUR 62 million). Income taxes for the financial year totalled EUR -5 million (EUR -16

million). Parent company net profit for the financial year stood at EUR 17 million (EUR 59 million).

The Valio Group milk margin stood at EUR 983 million (EUR 1 008 million) and the milk return at 51.6 cents per litre (52.5 c/l).

#### Significant events after the close of the financial year

Valio's Board of Directors decided in January 2024 to reduce the price paid for raw milk by two cents per litre as of the beginning of February 2024. The underlying factors affecting the decision were the fall in the global market prices of industrial dairy products, and in consumer demand.

In January, Valio commenced change negotiations concerning 1 170 people. As a result, it was initially estimated that a maximum of 130 people would be affected by personnel reductions, and of 135 people by planned substantial changes to terms and conditions of employment. Ultimately, those figures were 89 and 114 people, respectively. The factors underlying the negotiations were the fall in global market prices and consumer demand, as well as the need for adaptation due to increasing costs. The goal of the negotiations was to improve Valio's profitability and secure its ability to pay dairy co-operatives for their raw milk.

There have been several political strikes in Finland in early 2024. While some Valio units were on strike for a few days, production and deliveries were largely completed as per normal. In March, sea container transports were halted completely for two weeks, so deliveries to international customers will be delayed significantly. Most of the deliveries to the EU area could be completed, although they have entailed challenges, too. Interruptions to deliveries also involve significant challenges and costs in terms of warehousing. During the spring months, it is highly likely that Finnish ports will be congested, container availability poor, and cargo ship capacity fully booked, which will in turn result in further delays. The final costs and effect on business operations cannot be assessed until later in the spring.

#### Year 2024

The global population is growing, and world food needs will double by 2050. At the same time, climate change is forcing our food system to renew itself. Hence, our local and global food systems are facing unprecedented challenges.

We at Valio believe a sustainable food system of the future will be a combination of a number of forms of food production, some of which already exist while others are being studied. In order to secure enough food for all the people of the world in the future, we need plant-based foods, sustainably produced milk and meat, and new innovations in cellular agriculture. Valio is involved in all of these.

It is best to produce food where it is most sensible in terms of farming conditions, financially profitable, and sustainable from the perspective of climate and nature. Most often, it is viable to cultivate plants that require heat and light in the farmlands of the South. In the North, grass growth in fields produces a secure crop that is eaten by cows, which in turn produce nutritious milk.

Although the operating environment is currently challenging with respect to business operations, food is a global growth business in the long term. The

consumption of dairy products is growing in emerging markets such as Asia, and of plant-based products in the western world.

Year 2024 is continuing to progress along the guidelines of Valio's strategy. Our goal is that strategic projects will generate new growth, improve operational efficiency, and enhance profitability in the coming years. We purposefully continue, for example, to develop our expertise in value added powders, R&D, sales, and production. Our Valio Aimo® wholesale unit aims to be a trailblazer in the Food Service market in Finland. Suomen Lantakaasu Oy, a joint venture with energy company St1 Oy, is continuing operations in 2024 according to its business plan. It is intended that the final investment decision on the hybrid facility in the Northern Savo region will be made in autumn 2024, and that the plant will be in operation by 2026.

In 2024, Valio will initiate Food 2.0, an extensive research, development and innovation project. The goal of the five-year project is to create in Finland an environmentally sound food system in which growth, profitability, and added value are built on the foundation of sustainable production. In February 2024, Valio's Food 2.0 project was granted funding of EUR 10 million by Business Finland's challenge competition for leading companies. In addition, Business Finland is prepared to provide funding of EUR 20 million to RDI projects run in Valio's partner network within the Food 2.0 concept. The food system is linked to hundreds of companies and other actors in Finland, and the aim is to have at least one hundred partners in the network. The goal is to generate additional investments of EUR 100 million in research and development activities in Finland over a period of five years, and to grow exports linked to the food system as a whole by more than one billion euros in the years after the project. Valio is the first food industry company to be selected by Business Finland as a leading company. The Food 2.0 themes include future products, technological transition, regenerative agriculture, circular economy, and resource efficiency.

The operating environment is still challenging and hard to anticipate. War is being waged in Ukraine and Gaza, and elections will be held in a large number of countries during the year. In Finland, several trade unions are objecting to the government's labour market measures, and have or may take industrial action.

After an exceptional period, the prices of industrial dairy products have returned to their five-year average level. In recent months, the global market prices have shown some signs of picking up, but they are still around 25–40 per cent lower compared to their peaks in 2022.

Dairy farm production costs are expected to remain high in the future. Valio's primary purpose is to process the raw milk produced by its owners, Finnish dairy farms, as profitably as possible, and pay the best possible return through the cooperatives to the dairy farms.

#### The Board of Directors' proposal on the distribution of profit

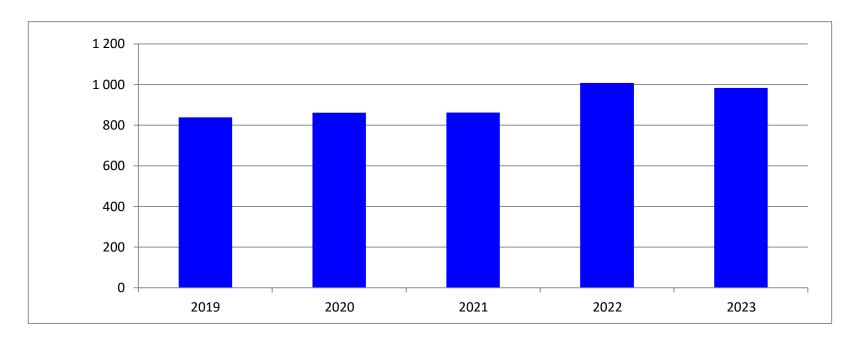

The parent company's distributable assets amount to EUR 301 102 241.33, of which profit for the financial year accounts for EUR 17 389 849.64 and retained earnings EUR 283 712 391.69. The Board of Directors proposes to the Annual General Meeting that a dividend of 3.33% on the nominal value of the shares be declared, or 113.22 euros per share, totalling EUR 5 532 042.42.

### Valio Group five-year statistics

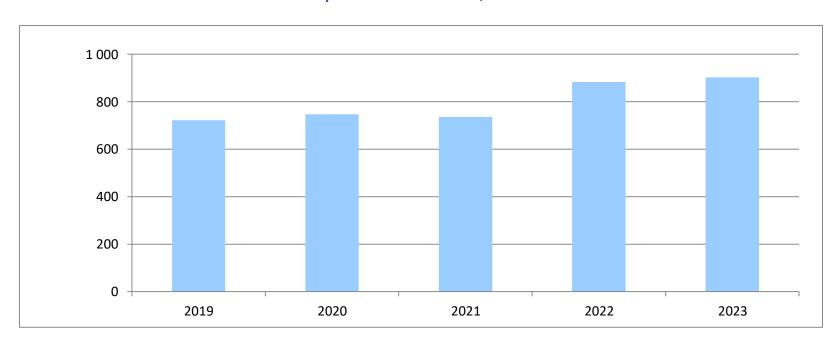

|  | 2023  | 2022  | 2021  | 2020  | 2019  |

- 1) Comprising the raw milk price, after payment, dividend and interest.
- 2) Includes the basic price, and extra payments according to composition and quality; extra payments for organic milk; after payment.
- 3) Shareholders' equity divided by balance sheet total from which advances received have been deducted. Shareholders' equity also includes minority interest. Long-term capital loans under liabilities are not included in shareholders' equity.
- 4) Net sales less all other costs excluding the price paid to the co-operatives for raw milk, interest on shareholder loans, depreciation according to plan, supplementary payments to the pension fund, pension contribution refunds, and items not included in actual business operations, such as sales gains from sales of business operations, provisions, sales gains and losses from real estate sales, write-offs of non-current assets, costs arising from acquisitions of companies and business operations, and subsidiaries' minority interest of the profit. The milk margin includes Valio Ltd's taxes, with the tax share of the net profit corresponding to the amount of the average dividend percentage from the share capital, and taxes of subsidiaries. Taxes also include the cost effect of direct taxes resulting from depreciation deficit.
- 5) Milk margin less estimated required financing for investments, and the figure is divided by the milk volume taken in from the owners of Valio Ltd.

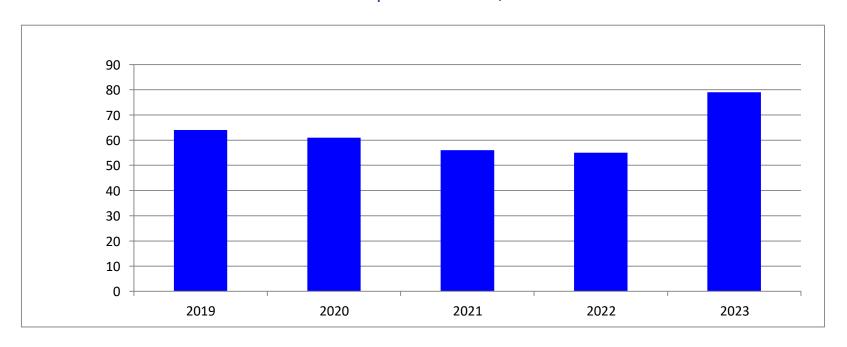

Valio Group milk margin, MEUR

# Notes to the Consolidated and Parent Company Financial Statements

#### ACCOUNTING PRINCIPLES

The consolidated financial statements include the parent company and the subsidiaries in which the parent company holds more than 50% of the voting rights, either directly or indirectly. Associated companies have been consolidated using the equity method. The share of the associated companies' net profit for the financial year in accordance with the Group's ownership is presented in financial items.

The consolidated financial statements have been prepared using the acquisition method. All intercompany accounts and transactions have been eliminated. Minority interests have been separated from the consolidated shareholders' equity and profit for the financial year, and presented as a separate item.

The accounting principle for minority interest in the consolidated financial statements relating to the minority holding of Oddlygood Global has been amended in the financial year 2023. The information on the comparison period in the financial statements has been corrected concerning equity and minority interest. The amended accounting principle corresponds with the interpretation on how the minority interest is separated from Oddlygood Global's profit and balance sheet, based on the stipulations of the Articles of Association concerning the distribution of assets, and the terms and conditions of the shareholder agreement. As a minority interest in the balance sheet, Oddlygood Global's shareholders' equity and profit for the financial year are separated for the minority in full, until the amount of equity reaches the acquisition cost of the A series shares paid by the minority shareholder.

The income statements of foreign Group companies have been translated into Finnish currency at the average exchange rate of the financial year, and balance sheets at the exchange rate on the closing day of the financial year. The exchange rate differences generated in the translation and the translation adjustments created in the translation of shareholders' equity of foreign subsidiaries are included in other reserves.

Exchange rate differences resulting from a long-term loan granted to a foreign subsidiary which is comparable to an investment of shareholders' equity are recorded for the Group as translation difference of shareholders' equity.

Intangible assets and property, plant and equipment of non-current assets are recorded in the balance sheet at the acquisition cost less depreciation according to plan and reduction in value. Depreciation according to plan is calculated as straight-line depreciation on the basis of the useful life of the item. The depreciation plan is the same as in the previous year.

Depreciation and amortisation periods are:

Consolidation goodwill 25 years Goodwill 20-25 years Intangible rights and other capitalised long-term expenditure 5-10 years **Buildings and constructions** 10–25 years Machinery and equipment 5-20 years Computer hardware and software 3-5 years Transport equipment and some refrigeration equipment 3-15 years Other intangible assets 5 years

Investments and non-current financial assets have been recorded in the balance sheet at the lower of acquisition price or fair value.

The information on the comparison period in the consolidated financial statements has been corrected regarding intangible and tangible assets in the notes to the balance sheet. The changes in the comparison period concern the following asset groups: other intangible assets, buildings and constructions, machinery and equipment, and other tangible assets. The changes resulting from the sale of the Russian business operations have been taken into account in the disposals and accumulated depreciation on disposals in the comparison period of the aforementioned assets. The correction of the information on intangible and tangible assets in the comparison period does not affect the figures in the income statement and balance sheet.

Liquid assets include cash in hand and cash at bank.

The company uses derivatives to hedge currency exchange risks. Unrealised negative changes in fair value are recorded as expenses for the financial year, while unrealised positive changes in fair value are not rendered as income. There were no open hedging contracts in the financial statements.

The company has a capital loan, in accordance with Section 12 of the Limited Liability Companies Act, totalling 77 626 800 euros. Of that amount, 30 000 000 euros is capital loan recorded under shareholders' equity, in accordance with Chapter 5, Section 5c of the Finnish Accounting Act. The share of capital loans recorded in shareholders' equity has no due date. Interest is paid once a year. The rest of the capital loan, amounting to 47 626 800 euros, has a due date, and shall be repaid as a lump sum on the due date. Interest is paid once a year. The principal and interest on the loans shall be repaid at a lower priority than debts to other creditors, were the company to be placed in liquidation or declared bankrupt. The principal may otherwise only be returned and interest paid to the extent that the total of the company's non-restricted shareholders' equity and all capital loans exceeds the amount of loss confirmed for the company's most recent financial year or included in more recent financial statements at the time of payment. No security shall be given for the payment of the principal or interest. If interest cannot be paid, it shall be transferred for payment on the basis of the first such financial statements that allow its payment. No unpaid interest not entered as cost has accrued for the loans.

Products manufactured in-house have been valued at the lower of immediate acquisition cost or probable sales price. Purchased products, raw materials, and packing materials are valued at acquisition cost or the lower of repurchase cost or probable sales price. Acquisition cost is determined using weighted average price or the FIFO method.

Deferred tax liabilities or assets have been calculated on the temporary differences between taxation and the financial statements, and on taxable loss using the prevailing tax base at balance sheet date.

The accounting of emission rights is performed in accordance with statement 1767/2005 of the Accounting Board. If the realised emission tonnage exceeds the rights granted, the cost of the excess tonnage is booked at the fair value of the day of closing the accounts and provisions are booked as counter-account. If the realised tonnage is below the rights granted, these assets are specified in the notes to the accounts. Trading of emission rights is booked as transactions on an accrual basis.

All figures in EUR '000s.

Hedged item: Trade receivables in CNY.

Hedging derivative: CNH currency derivative with nominal value of 130 000 000.00.

Type of hedging: Hedging of cash flow.

### 29. OTHER FINANCIAL LIABILITIES

### Real estate investments

The company has made value added tax deductions on real estate investments which involve a possible obligation to re-evaluate the amount of tax deducted if the premises are taken into use where value added taxation is not applicable. Such a change is not, however, in sight.

### Redemption obligations in energy contracts

Valio Ltd has made several contracts, some long-term, for energy supply to its production plants.

The contracts include redemption obligations to power plants, if Valio withdraws from a contract during the contract period. The maximum amount of redemption obligations stood at 34.87 million euros on 31 December 2023.

### Proposal by the Board of Directors to the Annual General Meeting

Distributable earnings in the financial statements amount to EUR 301 102 241.33. There have been no material changes in the company's financial position after the balance sheet date, and neither does the liquidity test referred to in section 13:2 of the Companies Act affect the amount of distributable earnings. The Board of Directors proposes to the Annual General Meeting that the distributable assets be used as follows:

| Retained earnings                 | 283 712 391.69 € |
|-----------------------------------|------------------|
| Net profit for the financial year | 17 389 849.64 €  |
| Total                             | 301 102 241.33 € |

The Board of Directors proposes to the Annual General Meeting that a dividend of 3.33% on the nominal value of the shares i.e. 113.22 euros per share be declared.

5 532 042.42 €

Should the Annual General Meeting approve the above proposal, company shareholders' equity would be as follows:

| Share capital              | 166 127 400.00 € |
|----------------------------|------------------|
| Legal reserves             | 5 984 101.53 €   |
| Retained earnings          | 295 570 198.91 € |
| Capital loan               | 30 000 000.00 €  |
| Total shareholders' equity | 497 681 700.44 € |

### THE AUDITOR'S NOTE

Our auditor's report has been issued today.

25 March 2024

PricewaterhouseCoopers Oy **Authorised Public Accountants** 

Niina Vilske Authorised Public Accountant (KHT)

### Auditor's Report (Translation of the Finnish Original)

To the Annual General Meeting of Valio Ltd

### Report on the Audit of the Financial Statements

### Opinion

In our opinion, the financial statements give a true and fair view of the group's and the company's financial performance and financial position in accordance with the laws and regulations governing the preparation of financial statements in Finland and comply with statutory requirements.

#### What we have audited

We have audited the financial statements of Valio Ltd (business identity code 0116297-6) for the financial year ended 31 December 2023. The financial statements comprise the balance sheets, the income statements, cash flow statements and notes for the group as well as for the parent company.

#### **Basis for Opinion**

We conducted our audit in accordance with good auditing practice in Finland. Our responsibilities under good auditing practice are further described in the Auditor's Responsibilities for the Audit of Financial Statements section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Independence

We are independent of the parent company and of the group companies in accordance with the ethical requirements that are applicable in Finland and are relevant to our audit, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

# Responsibilities of the Board of Directors and the Managing Director for the Financial Statements

The Board of Directors and the Managing Director are responsible for the preparation of financial statements that give a true and fair view in accordance with the laws and regulations governing the preparation of financial statements in Finland and comply with statutory requirements. The Board of Directors and the Managing Director are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors and the Managing Director are responsible for assessing the parent company's and the group's ability to continue as a going concern, disclosing, as applicable, matters relating to going concern and using the going concern basis of accounting. The financial statements are prepared using the going concern basis of accounting unless there is an intention to liquidate the parent company or the group or to cease operations, or there is no realistic alternative but to do so.

#### Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with good auditing practice will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with good auditing practice, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or
  error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is
  sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material
  misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve
  collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that
  are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness
  of the parent company's or the group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of the Board of Directors' and the Managing Director's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the parent company's or the group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the parent company or the group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events so that the financial statements give a true and fair view.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

### Other Reporting Requirements

#### Other Information

The Board of Directors and the Managing Director are responsible for the other information. The other information comprises the report of the Board of Directors.

Our opinion on the financial statements does not cover the other information.

In connection with our audit of the financial statements, our responsibility is to read the other information and,

in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. Our responsibility also includes considering whether the report of the Board of Directors has been prepared in accordance with the applicable laws and regulations.

In our opinion, the information in the report of the Board of Directors is consistent with the information in the financial statements and the report of the Board of Directors has been prepared in accordance with the applicable laws and regulations.

If, based on the work we have performed, we conclude that there is a material misstatement of the report of the Board of Directors, we are required to report that fact. We have nothing to report in this regard.

#### Other Statements

We support that the financial statements and the consolidated financial statements should be adopted. The proposal by the Board of Directors regarding the use of the profit shown in the balance sheet is in compliance with the Limited Liability Companies Act. We support that the Board of Directors and the Managing Director of the parent company should be discharged from liability for the financial period audited by us.

#### STATEMENT BY THE SUPERVISORY BOARD

We have examined the financial statements of Valio Ltd, the consolidated financial statements and the Board of Directors' report for 1 January to 31 December 2023, and the auditor's report.

We recommend approval of the financial statements and consolidated financial statements, and concur with the Board of Directors' proposal for profit distribution.

Helsinki, 26 March 2024

On behalf of the Supervisory Board

Esa Kotala Chairman

### Valio Ltd owners 31 Dec. 2023

Valio Ltd is owned by dairy farmer communities that collect or process milk. Production is primarily based on milk delivered by co-operatives committed to Valio.

The company's owner-management comprises the Annual General Meeting, Supervisory Board, and Board of Directors.
